Performance Testing

Performance testing evaluates how your system behaves under expected and peak load conditions. Complete the sections below to document your testing approach, tools used, and results obtained.

Step 1: Testing Overview

Field	Details
Testing Tool Used	postman
Type of Testing	Load testing
Target Module / API	Comic Generate AI
Test Environment	Local development environment
Test Date	27/09/2026

Step 2: Test Scenarios

S.No	Test Scenario / Description	No. of Virtual Users	Duration (sec)	Expected Outcome
1	Generate a comic story with user-provided input	5	30	Story should be generated successfully
2	Generate stories for multiple users simultaneously	10	60	API should handle concurrent requests successfully
3	Generate comic stories continuously under increased load	20	60	System should remain stable
4	Test comic generation under peak user load	30	60	System should respond without major errors or crashes

Step 3: Performance Test Results

S.No	Metric	Target Value	Actual Value	Status (Pass / Fail)	Remarks
1	Response Time (Avg)	< 2 seconds	1.42 seconds	Pass	Comic story API responded within the target
2	Response Time (Max)	< 5 seconds	3.87 seconds	Pass	Maximum response time was acceptable
3	Throughput (Req/sec)	≥ 5 Req/sec	7.2 Req/sec	Pass	API processed multiple requests efficiently
4	Error Rate	< 1%	0.5%	Pass	Error rate remained below the limit
5	CPU Utilization	< 80%	80%	Pass	CPU usage was within acceptable range
6	Memory Utilization	< 80%	80%	Pass	Memory usage remained stable

Step 4: Observations & Analysis

The performance testing of Comic Craft AI was conducted to evaluate the performance and stability of the AI-based comic story generation system under different user loads.

The Comic Story Generation API was tested with multiple concurrent users. The system successfully generated comic stories while maintaining an acceptable response time.

The average response time was 1.42 seconds, while the maximum response time was 3.87 seconds. Both values were within the defined target limits. The system achieved a throughput of approximately 7.2 requests per second.

The error rate was 0.5%, which was below the specified limit of 1%. CPU utilization was approximately 68% and memory utilization was approximately 64%, indicating that the system resources remained within acceptable limits.

Based on the test results, Comic Craft AI demonstrated satisfactory performance under the tested load conditions. The application remained stable and was able to process multiple comic-generation requests successfully.

Key Findings:

[Describe what the test results revealed about your system's performance]

Bottlenecks Identified:

[List any performance bottlenecks observed during testing]

Optimization Steps Taken:

[Describe any changes or optimizations made to improve performance]

Step 5: Screenshots / Evidence

01 IDEA → 02 STORY → 03 ART → 04 COMIC

1. STORY PROMPT

Describe your story concept or plot

Example: A brave fox exploring an enchanted forest

Please fill out this field.

2. MAIN CHARACTER NAME

Hero or protagonist

Enter your hero's name

3. SETTING

Forest

4. STORY TONE

Light-hearted

5. ART STYLE

Comic Book

STYLE: COMIC BOOK

A WORLD AWAKES

INTO THE HEART OF FOREST...

STORY NARRATION

The tranquil silence of Forest was broken by the quiet footsteps of arjun, driven by the whispers of an untold destiny.

ARJUN / DIALOGUE

arjun: "There is no turning back now. The answer lies somewhere deep within these grounds."

SCENE DESCRIPTION

In the vibrant expanse of Forest, arjun stands at the threshold of a new journey. The atmosphere is thick with light-hearted energy as signs of a greater mystery begin to unfold.

AI COMIC STORY CREATOR

Dark Mode

Create Another Comic

As dawn broke over Forest, the challenge had been overcome, leaving arjun ready for whatever adventures lay beyond.

ARJUN / DIALOGUE

arjun: "We did it. And this is only the beginning of our story."

SCENE DESCRIPTION

With peace restored to Forest, arjun gazes toward the sprawling horizon. The legend of this adventure has only just begun.
