

Brainstorming & Idea Prioritization Template

Date 2 OCT 2026
Team ID 6aba3aa9ca93a27509644a39
Project Name ComicCraft AI – AI Comic Story Creator using Gemini Models
Maximum Marks 3 Marks

Step 1: Brainstorm and Idea Listing

Each team member lists ideas related to the ComicCraft application. The ideas below are drawn from the project description and workflow.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	S. Tarunikha Sahana Shree	Generate a structured five-panel comic outline from the user's story prompt. Each panel should include a panel number, title, scene description, and image-generation prompt.	AI story outlining	6aba3aa9ca93a27509644a39
2	R. Sharmila	Expand the outline into a complete comic story with engaging narration and character dialogues using a Gemini text-generation model.	AI storytelling and dialogue	6aba3aa9ca93a27509644a39
3	S.Charumathi	Generate comic-style illustrations for each panel from the image prompts using Stable Diffusion through Hugging Face Diffusers.	AI image generation	6aba3aa9ca93a27509644a39
4	M.Roshini	Create a simple web form that collects the story prompt, main character name, setting, story tone, and preferred art style.	Frontend and personalization	6aba3aa9ca93a27509644a39
5	B.Yashini	Display the generated comic panel-by-panel, including panel title, image, scene description, captions, and narration.	Comic preview interface	6aba3aa9ca93a27509644a39

Step 2: Idea Prioritization

The grouped ideas are rated for feasibility and importance. Priority numbers indicate the order for moving the selected project features forward.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
3	Gemini-powered five-panel outline and full story narration/dialogue	High	High	1	Yes
3	Stable Diffusion illustrations generated for each comic panel	Medium	High	2	Yes
3	Structured comic preview and downloadable PDF export	High	High	3	Yes

Project details used:

Comic Craft is a web-based AI comic creator. The documented workflow uses a FastAPI backend, HTML/CSS/Jinja2 frontend, Gemini models for outline and story generation, Stable Diffusion for illustrations, a panel layout builder, and PDF export.
