Define Problem Statements (Customer Problem Statement Template):

ComicCraft is designed to help users turn a simple story idea into a complete, personalized comic. The application accepts a story prompt, character name, setting, tone, and art style, then generates a panel-by-panel storyline, narration, dialogues, comic-style illustrations, and a downloadable PDF. This makes comic creation accessible to non-artists and casual users.

Example:

I am A non-artist or casual user	I'm trying to Create a personalized comic story with illustrations	But Creating stories, dialogues, and comic images manually is difficult and time-consuming	Because Comic creation needs writing, visual design, and image-generation skills	Which makes me feel Creative and confident about bringing my story idea to life
