Problem-Solution Fit Canvas:

Use the framework below to ensure your proposed solution accurately addresses the root causes, behaviors, and limitations of your target audience. Fill out the canvas in the respective boxes just like the original visual template.

1. CUSTOMER SEGMENT(S) [CS] - Aspiring comic creators and hobby writers with story ideas but no drawing skills - Teachers and students who want comic-based lessons - Small creators who share comics online	6. CUSTOMER LIMITATIONS [CL] EG. BUDGET, DEVICES - Low budget, so they cannot hire comic artists - No drawing or design skills - Mostly use a phone or basic laptop, so a light web app is needed	5. AVAILABLE SOLUTIONS [AS] PROS & CONS - Hiring artists: high quality, but costly and slow - Manual comic-maker tools: easy to start, but the user must supply art and layout - General AI image tools: fast, but characters change between panels
2. PROBLEMS / PAINS [PR] + ITS FREQUENCY Cannot turn story ideas into finished comics; AI panels look different each time (every comic project).	9. PROBLEM ROOT / CAUSE [RC] Comic art needs skill, time and money, and current AI tools lack character consistency and automatic layout.	7. BEHAVIOR [BE] + ITS INTENSITY Tries many apps, then gives up on hard ones (high intensity).
3. TRIGGERS TO ACT [TR] - Sees AI-made comics on social media - Has a story or lesson to share soon - Needs a quick, low-cost way to publish	10. YOUR SOLUTION [SL] Comic Craft AI turns a story script into a finished, illustrated comic. - AI storyboard and panel generation - Consistent characters in every panel - Auto panel layout and speech bubbles - Choice of art styles - Edit dialogue, then export PDF/PNG or share in the gallery - Auto-translation for multilingual comics	8. CHANNELS OF BEHAVIOR [CH] ONLINE Searches AI art tools, watches tutorials, browses comic communities
4. EMOTIONS [EM] BEFORE / AFTER Frustrated, then proud.		OFFLINE Discusses ideas with friends and sketches storyboards on paper
