Project Name	Comic Craft AI
Maximum Marks	4 Marks

Empathy Map

Create an empathy map to understand your customer/user from four perspectives - what they Say, Think, Do, and Feel - in relation to the problem your project addresses. This helps the team build a customer-centric solution.

SAYS • “I have great story ideas, but I can’t draw them.” • “Hiring a comic artist is too expensive for me.” • “I wish I could see my script as panels quickly.”	THINKS • Will an AI tool really understand my story? • Will my characters look the same in every panel? • Is this worth trying before paying for artists?
DOES • Writes scripts and sketches rough storyboards by hand. • Searches online for comic-making and AI art tools. • Tries different tools and gives up on complicated ones.	FEELS • Frustrated when the art does not match the story. • Excited about turning ideas into finished comics. • Worried about cost, time and quality.
